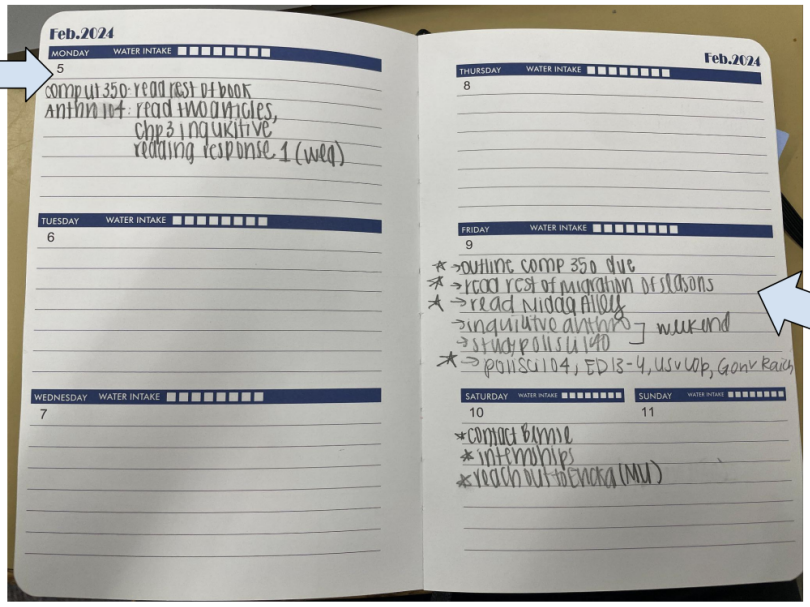
Yasmine Work Models

Artifact Model:

Yasmine's planner is organized by day so she can write out what she needs to get done. She uses this for things not on canvas and her personal life.

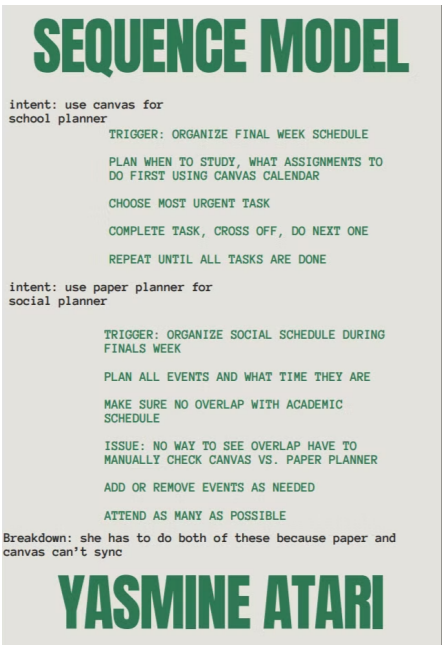
She crosses things out as she completes them, but here she had not finished any of her tasks yet.



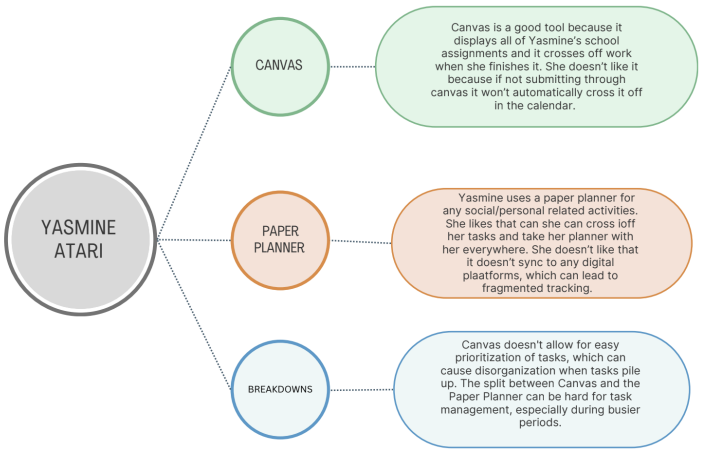
She uses stars for important things and to plan the order of importance

Breakdown: One thing her paper planner lacks is that it can't sync with canvas so she has to always check both.

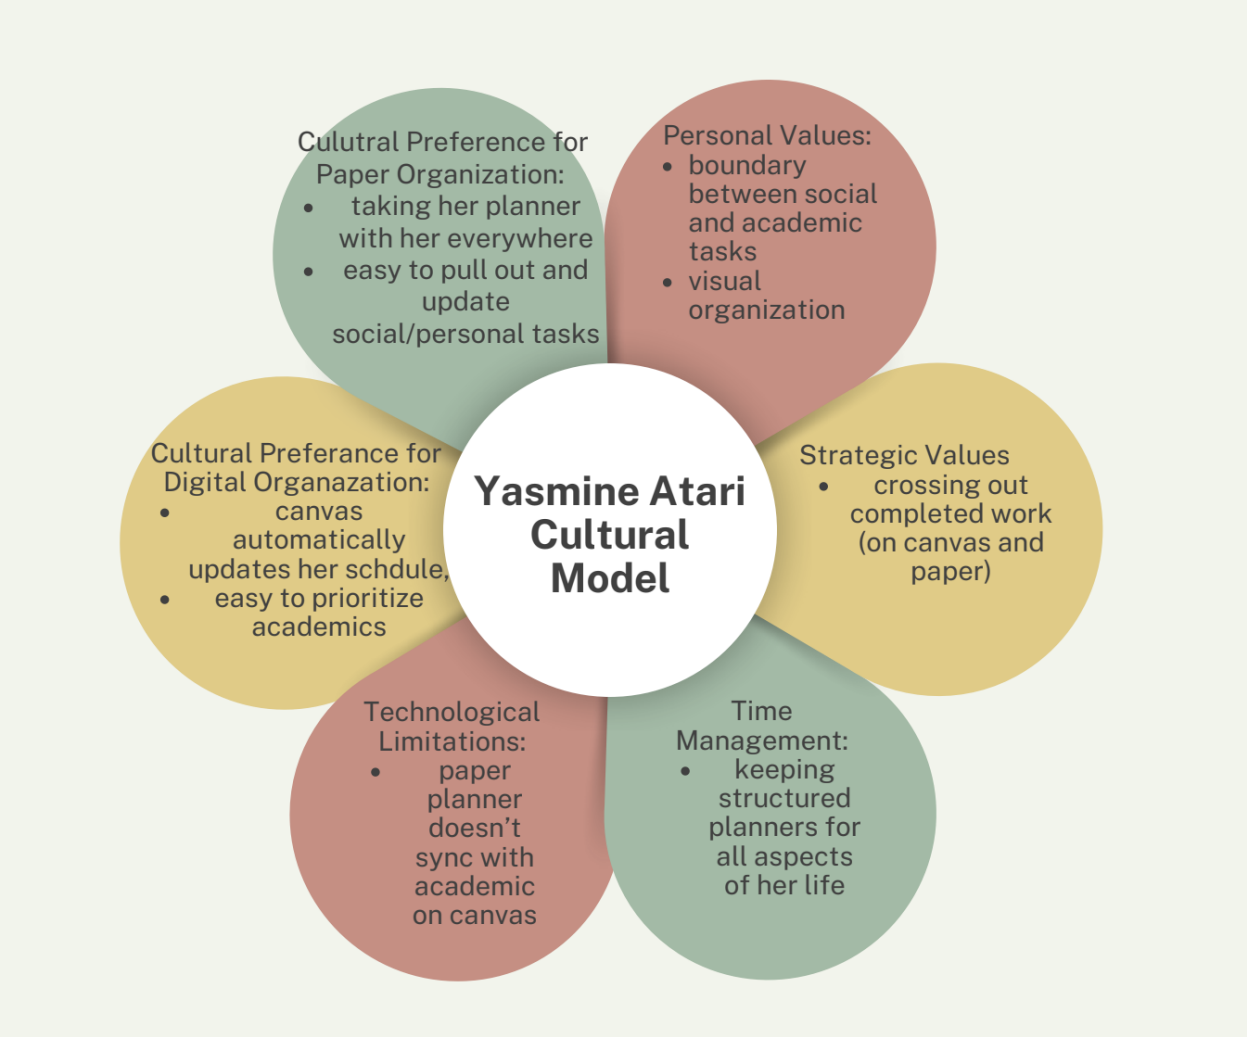
Sequence Model:



Flow Model:

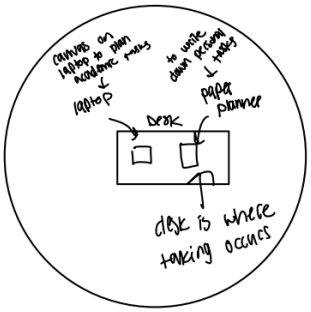


Cultural Model:



Physical Model:

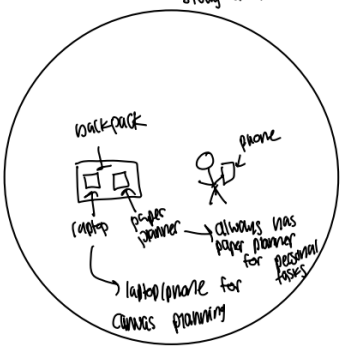
WORK SPACE #1 - HOME



personal space

↳ access away from workspace

WORK SPACE #2 - outside of home study area



Breakdowns:

canvas on the go and at-home:
can have wifi issues making it hard to plan

paper planner on the go:
- could forget / leave somewhere, lose all planning work

at home:
- leave somewhere else / can't find in home

both:
- can't sync to eachother so ALWAYS need both
